

*"That who seeks, shall find..."*

## Albert Aleksanteri Laine

Albert was born in Kotka, Finland in 1978. He is currently based in Helsinki, Finland.

Living his childhood in a artist family, expression became a necessity in life. All the way to the age of four, the visuals on their black and white TV set appeared as moving abstract blobs to Albert. The sensation, when the seemingly abstract shapes suddenly made sense, has guided the way he semiotically formulates his ideas.

After acquiring experience in motion graphics and TV production, Albert wanted to pursue the art of animation. He studied animation in the acclaimed Turku University of Applied Sciences / Arts Academy. Albert has worked in the field of commercial 3D animation, but feels at home when encompassing both artistic and technical aspects himself.

The first public presentation of Albert's semiotic visual work has been internationally successful.

Like many of his contemporaries, he uses a wide variety of techniques and medias to actualize his visions and ideas. Albert utilizes experimental electronics, sculpture and animation, to name a few.

Albert's work is a dialog of intuitive and conscious decisions. His fertile imagination guides him from personal subjects to general issues, common to us all.

With an never ending appetite to perceive and learn new things, his creative brainstorming often leads to unexpected solutions.
